EDUCATION

University of Toronto

Honors Bachelor of Science in Statistics and Mathematics

Toronto, ON

(June 2022)

Relevant Courses:

Methods of Data Analysis, Neural Networks and Deep Learning, Statistical Methods for Machine Learning

CERTIFICATE

ArcGIS Pro Foundation Certificate – Esri

Completed: Sept 2024

- Demonstrated proficiency in using ArcGIS Pro for spatial data analysis, map creation, and geoprocessing workflows, with practical applications in GIS projects.

SKILLS

Programming Languages: Python, R, SQL

GIS Software: ArcGIS Pro, QGIS, Google Earth Engine

Data Analysis & Visualisation: Excel, Power BI, Tableau, Google Analytics

Other Tools: FME, Salesforce

RELEVANT EXPERIENCE

GIS Analyst | [Climate Resilient Communities](#)

Toronto, ON | Apr 2024 - Present

- Assisted with data collection and analysis, applying strong attention to detail to ensure accuracy, relevant to verifying shipment contents.
- Developing a climate-resilient toolkit using ArcGIS Pro to provide local authorities with analytical tools for assessing environmental issues like vegetation cover, emergency routes, and heat index.

Data Analyst | [Openlane](#)

Toronto, ON | Oct 2022 - Mar 2024

- Improved data quality from **80% to 95%** by using machine learning algorithms (**regression, KNN**) and pandas/numpy for cleaning and assessing ownership datasets.
- Enhanced customer service and drove a **30%** business growth with major clients by refining ownership datasets in Salesforce and applying advanced Excel validation and reporting.

Course Coordinator and Teaching Assistant | University of Toronto, [MAccFin Program](#), [The BRIDGE](#)

Toronto, ON | Sept 2021 - Aug 2022

- Co-taught the Data Visualization course for MAccFin Program, using **Excel** and **Power BI** to elevate student proficiency, resulting in a **90%** success rate in final project presentations.
- Designed an R script to automate grade verification across five class sections, achieving **98%** accuracy and reducing grading time by **70%** through the application of database design principles.
- Created 20 advanced Excel tutorials for The BRIDGE program on Data Validation, VBA, and automation, boosting data literacy and analytical skills for Management students.

Quantitative Research Assistant | [Behavioural Economics in Action at Rotman \(BEAR\)](#)

Toronto, ON | May 2021 - Aug 2021

- Analyzed data to identify and resolve discrepancies, ensuring high data accuracy, directly applicable to checking for damages and discrepancies in incoming shipments.
- Contributed to research projects by identifying inconsistencies and suggesting process improvements, demonstrating problem-solving skills for operational efficiency.

Web Analyst | [University of Toronto Varsity Blues](#)

Toronto, ON | Sept 2020 - Apr 2021

- Conducted traffic analysis with **Google Analytics**, identifying key channels and optimizing marketing strategies that increased website traffic and event registrations.
- Improved ad timing and posting strategies for the Varsity Blues' volleyball campaign using Google Analytics, resulting in a **20%** increase in traffic compared to previous events.

GIS PROJECTS

Land Use Classification via Machine Learning | ArcGIS Pro · Machine Learning | [\(link\)](#)

- Applied **SVM algorithms** to classify aerial photos for land use analysis, significantly improving accuracy and utility for urban planning.

Identifying popular places within a City | ArcGIS Pro | [\(link\)](#)

- Applied **Spatial and Temporal Clustering** in ArcGIS Pro to analyze a spatiotemporal dataset, identifying the top 3 most popular San Francisco Bay Area locations

LiDAR Remote Sensing | ArcGIS Pro · Remote Sensing | [\(link\)](#)

- Applied LiDAR dataset and developed **(Digital Elevation Model) DEM** and **(Digital Surface Model) DSM** with ArcGIS Pro to map and analyze canopy cover and vegetation of the area.

Building house-valuation models | ArcGIS Pro · Remote Sensing | [\(link\)](#)

- Developed a property model using Generalized Linear Regression and Forest-based Classification and Regression in ArcGIS Pro, achieving 80% accuracy in predicting house sale prices.
